SHAPE GUIDE: ALL-ROUND MODELS

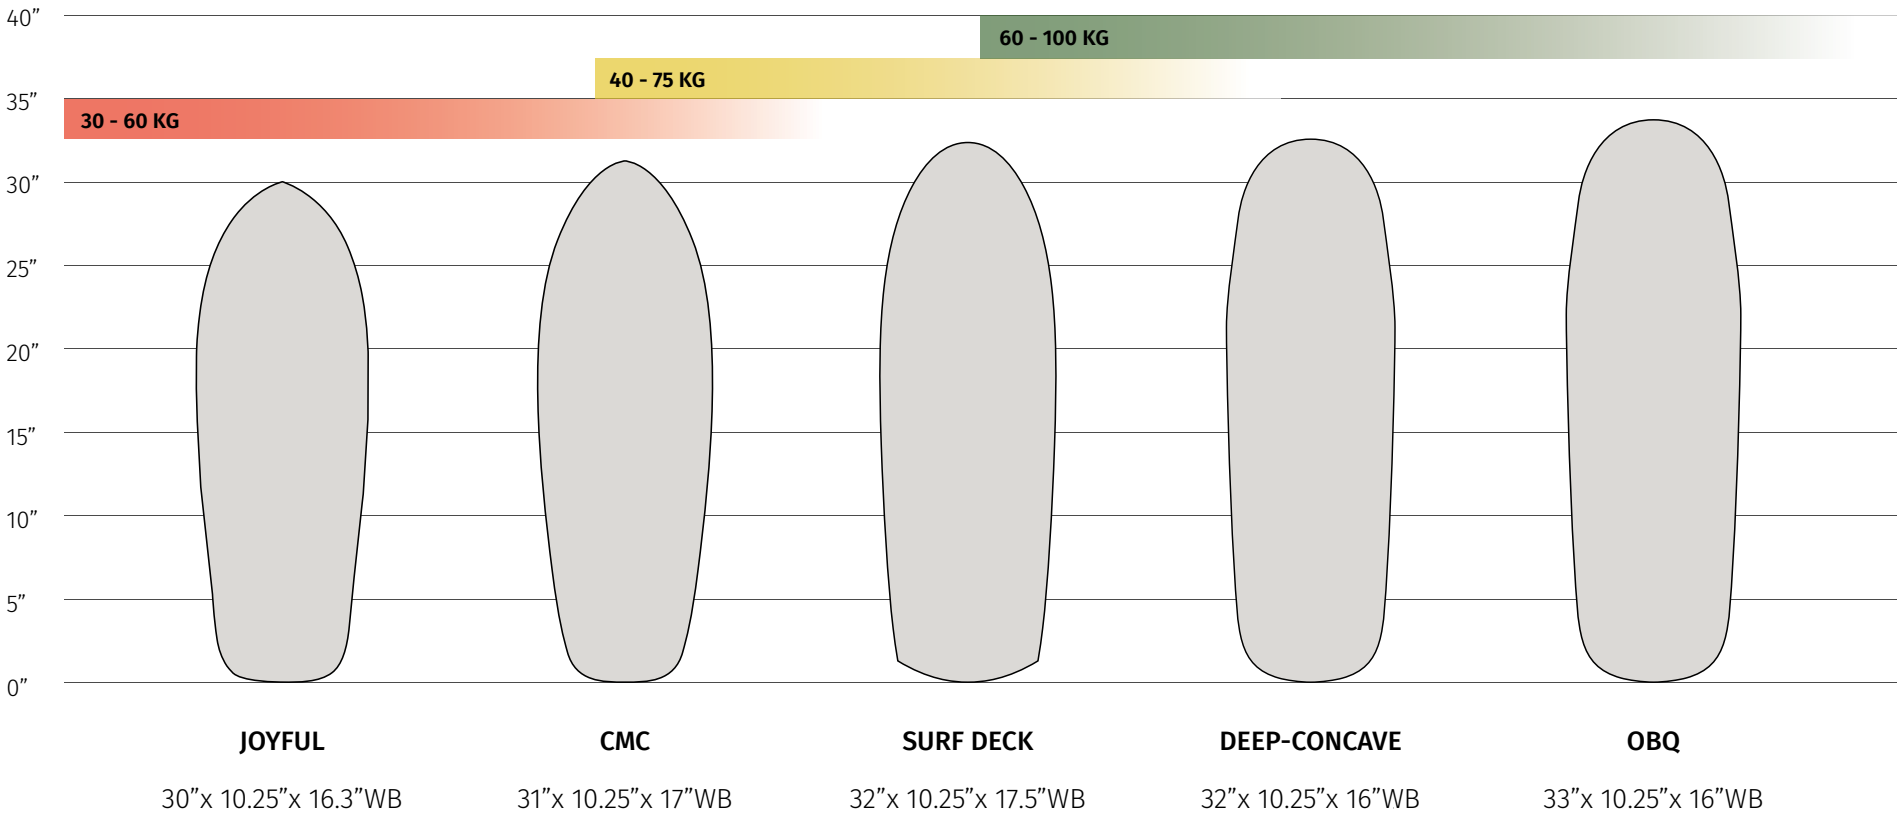

The original Slide surfskate decks have been developed with all types of riders in mind: Short and tall, lightweight and heavy, beginners and experts... The sizes go from 28” to 34” and, combined with our surf truck system, we cover the whole spectrum of riders.
These decks have a wide shape, a soft concave and a smooth kicktail. They are very manouverable boards meant to be ridden either or flat streets or inside the bowl or pumptrack. Meant for fun, long and smooth rides.

TRIM	QUAD	GUSSIE	FISH	DIAMOND	SWALLOW	EVO-LUTION
28”x 10.25”x 15.5”WB	30”x 10.25”x 15.5”WB	31”x 10.25”x 17”WB	32”x 10.25”x 17.5”WB	32”x 10.25”x 17.5”WB	33”x 10.25”x 18”WB	34”x 10.25”x 19”WB

SHAPE GUIDE: SURF SIMULATORS

Over many years, surfing and skating, Slide Surf Skates has been developing several models that are focused on simulating surfing.
Featuring extra concave or shorter wheelbase, the combination of these decks and Slide Surf Skate trucks will bring you a genuine surf feeling out of the water, allowing a natural surfing stance and maximising the very best of Slide trucks.
These boards are for practicing your surf-like turns, in the skatepark, on pump tracks, or cruising the streets of your town.

SHORT BOARDS (28”- 30”)

TRIM CITRUS

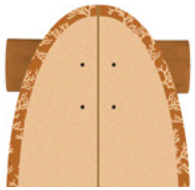

SL0061

QUAD AUKA

SL0031

SHORT BOARDS (28”- 30”)

The trim 28” is short in length and wheelbase, enabling smaller and lighter riders to pump, generate speed and practice sharp turns, on either flat surfaces or in the bowl. Trim is quick and reactive, but stable and long on fun

The best selling Quad, is inspired by the shape of a 4 (quad) fin summer surfboard built for fun. This board is for carving control during intense, long rides. The Auka model is a collaboration with WSL European Junior surf champion and Olympic surfer Janire González-Etxabarri. She chose the seaweed print as a tribute to her local beach, Itzurun. Auka means ‘seaweed’ in the Basque language, where Janire grew-up and surfs.

CMC 31”

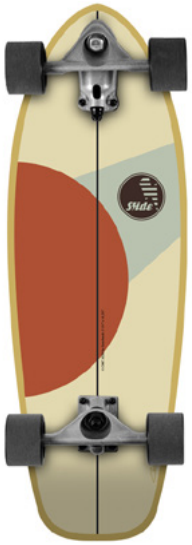

COLD GOLD

SL0051

DAWN

SL0067

CMC 31”

This 31” shape has been developed by Carlos Martin. Carlos’ skating combines wide, open lines with sharp turns. He enjoys going vertical at the bowl as much as he enjoys pumping and generating speed down the line, always riding with flow and style.

This board has been designed for high performance riders. The fuller nose makes for easy front foot control, and the wider tail helps with the sharpest of turns and maneouvres.

SL0063

GUSSIE 31”

Developed in Australia, Gussie has been designed for extra stability and maneuvrability, with a very similar feeling to surfing, suitable for horizontal cruising or pool carving.

Gussie is super versatile, recommended for riders who are experienced surfers or skaters, but also for beginners who want to improve their balance and reaction times. Gussie is built to be your best friend on flat days.

3/4 PATCH

SL0045

TECH-TONIC

SL0053

FISH 32”

With its fuller nose and smooth lines, the Fish Models are great fun to surf the street and have everything under control. The graduated kicktail allows sharp pivot turns and hold through slides.

The Fish is a perfect shape for those surfers used to extra volume at the nose of their board. It is stable and enjoyable for riders looking for a model that allows slides, practicing tight turns, and improving balance when generating speed.

BOMBORA

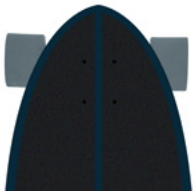

SL0046

SPEER

SL0054

DIAMOND 32”

Inspired by the classic Single fins of the 70’s, this shape is your perfect weapon to surf the streets and polish style while getting ready for epic conditions.

The Diamond is a stable low volume shape. With a constant curve outline and tucked tail, developed for reliability. Its set-up makes it perfect for learners that are getting into the surf culture and for those old-school surfers wanting to keep the stoke out of the water.

SURF DECK 32”

CHICALA

SL0058

OKANDA

SL0059

SURF DECK 32”

As the winter arrived to the Northern hemisphere at the end of 2022, we started working on the development of a longer version of the Slide 31” CMC. Some of our team riders needed extra inches to keep their natural surf stance on their surfskate deck, and that’s exactly what we made!

A semi-wide nose that provides the manouverability and turning control of the CMC, combined with an extra-wide tail to push turns as hard as you can.
The perfect combo to push your surf skills further.

SURF SIMULATORS (32”- 33”)

DEEP-CONCAVE RIPPING

SL0068

OBQ 1

SL0064

SURF SIMULATORS (32”- 33”)

The Deep-Concave 32” is the new addition to the Slide collection. Together with our team riders, we have built a board that will take your surfing skills further. This board combines extra concave with a slightly extended nose and short wheelbase, providing turning control and manouverability. A great choice for riders with a traditional skateboarding background.

The OBQ 33” (One-Board-Quiver) is for the next level of surfing and surf skating, in the words of Jack Hu, Slide’s founder and technical guru. This board has been developed to produce the closest feel to surfing while ‘surf skating’. Built to train, to improve skating, and surfing! The board has amazing manoeuvrability, with quick-response to body adjustments and is highly suitable for advanced surf training.

KAOLIN

SL0065

SALADITA

SL0041

SWALLOW 33”

A great option for longboarders and heavier skaters.
The high volume deck allows you to practice wide turns, move and feel the ride, the same as surfing your fun or longboard.

The Swallow is the perfect model for bigger sized riders and for those who are more comfortable with wider shapes and bigger wheels under their feet.

SLIDE TECHNOLOGY

SLIDE 3.5 TRUCK TECHNOLOGY

The Slide team is constantly working to improve the truck system. Our unique front truck has been redesigned up to 3 times to increase the surf feeling when riding our boards. Moreover, we have combined the extra height and turn of the front truck with a higher rear truck. This makes the riding experience much more surf-like, as the rear truck can follow the turns of the front truck.

All our boards are set-up with the 3.5 version of our front and rear truck since 2022.

SLIDE SURFSKATE DISPLAY

SL0066

SURFSKATE DISPLAY

Our new surfskate display is available for all Slide retailers and distributors. This piece of furnite is made of birch wood and the racks are covered with black foam to protect the decks.

No tools are needed for its assembly, it holds up to 6 complete boards and it’s made in Portugal.
